EXPERIENCE

Co-operative Education Work Term I
Project Programming Intern
University of Petroleum and Energy Studies

📅 Jun 2018 – Oct 2018   📍 Dehradun, India

– Programmed an IoT (Internet of Things) system that would turn any regular device to a smart home device, which could be controlled with Alexa and a smartphone application.
– Built and managed a database for the smart home devices.
– Created a responsive website and a smartphone application to control and display the status of the live smart home devices.
– Used Amazon Web Services (AWS) to connect the IoT system to Alexa.

Stagehand (Special Effects Technician)
Edex, IISJ

📅 Dec. 2017   📍 Jeddah, KSA

– Assisted in building the stage for the event, ensuring compliance to safety and specification.
– Developed the special effects device for the stage illusion.
– Coordinated the event for two days with over 40 shows.
